warrants were executed at the residence in Coutts and the associated trailer. At these locations RCMP located a significant stash of weapons including carbines. The search was ongoing through the night. Further reporting on this to follow.
The plan for 2022 02 14, is to secure the locations in Coutts of interest and then proceed to dismantle the blockade.
Excellent work by K Div and no doubt will continue through the day.
Super work.
It's really unfortunate that they had to be pushed but it is a very good outcome.
It will be very useful to make that information public to help those idiot police officers who think this is a lark that there are people on the other side who want to kill then.
I see none of this has made it into the update coming out of GOC.
